

# Avaz Helps in the Car

A social story for Kairav — Using AAC device during long car rides to communicate needs

1

Sometimes my family goes on long car drives. I sit in the back seat with my Avaz.

2

My Avaz is safe on my lap tray. I can touch it to tell Mama and Papa what I need.

3

I tap 'music please' on my Avaz. Mama hears it and turns on my favorite songs.

4

When I tap 'bathroom' on my Avaz, Papa finds a good place to stop. My words help my family know what I need.

5

My Avaz helps me talk to my family during long car rides. I feel happy when they understand my words.
