

# My Arm's Distance Away

A social story for Kairav — Learning to give friends comfortable space by staying one arm's length away

1

I like to be close to my friends. Sometimes I stand very close to them.

2

Quacky shows me about arm space. One arm away is good space for friends.

3

I can check my arm space. I put my arm out to see the right distance.

4

If I am too close, I can step back. This gives my friend good space.

5

Good space makes my friends happy. I can ask before I give a hug.
